

ALL-IN-ONE

Customer-oriented Service

SENCOOP

Customer-oriented Service

Senop is specialized in customized high precision glass optics. We have over 75 years of experience and expertise in optics. Our strength lies in flexibility to customer needs and swift deliveries. Our service chain, combined with experience translates into speed: single items even within a week, serial production as agreed, and always on time. Our experts support you from the first design phases of a project to the manufacture of the end product.

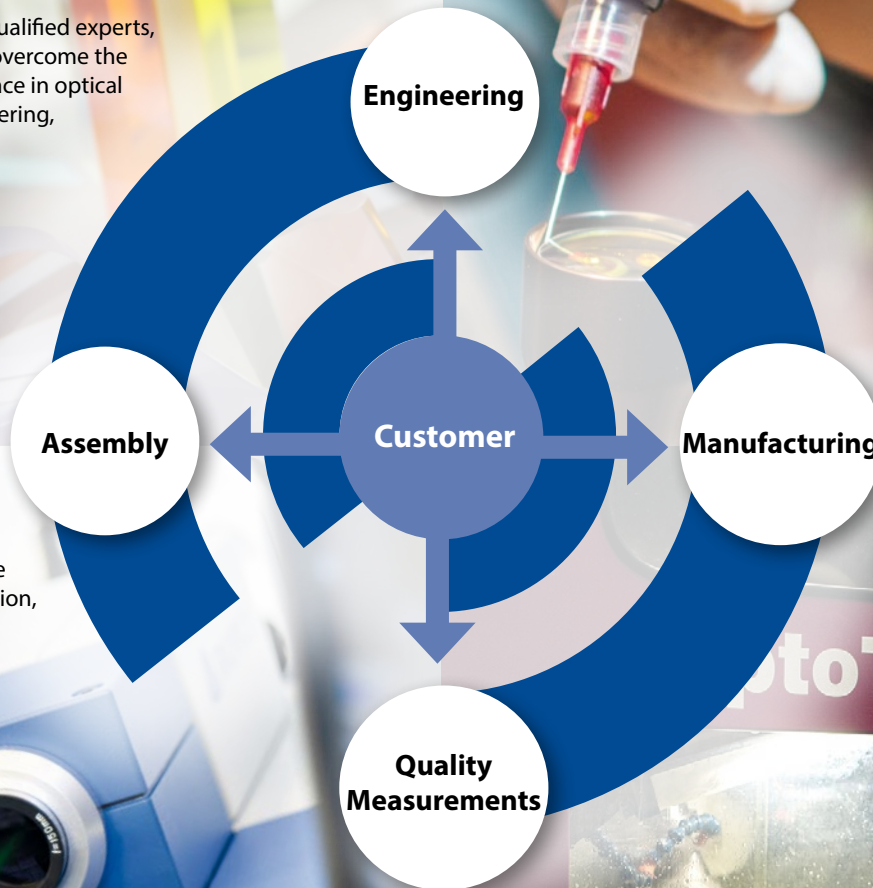

OPTICAL DESIGN AND ENGINEERING – ADVANCED COLLABORATIVE DESIGN APPROACH

Together with our highly qualified experts, our customers are able to overcome the complex challenges they face in optical design, mechanical engineering, optical coating design and production planning.

We design and manufacture products, from prototypes to serial production and from individual components to completed devices. Utilizing the latest technology in design tools, optics and optical coating machinery with the highest precision metrology equipment we meet the most demanding customer requirements.

TURNKEY SERVICE FROM START TO FINISH ACCORDING TO CUSTOMER PREFERENCES

The Senop service concept offers flexibility with short lead time. Optical and mechanical engineering services, optical workshop, coating lab, assembly line, quality verification lab, all found under same roof.

MANUFACTURING

When it is time to refine the prototype to serial production, Senop can help you with processes to scale up.

OPTICAL MANUFACTURING & MEASUREMENTS

With state of the art fabrication and metrology equipment, together with highly qualified experts, even the toughest customer requirements can be met.

STANDARDIZED QUALITY

Our operations comply with the following standards and criteria: ISO 9001 and AQAP-2110.
